

Lining Solutions That Are Not Watered Down

Stonhard's Stonchem® provides long-term solutions for water/wastewater treatment facilities. And a single source warranty on products and installation.

STONHARD®

Stonhard has lining solutions for your water/wastewater needs now...and in the future. Our progressive formulations are designed to provide your facility with long term solutions for:

- Headworks
- Clearwells
- Equalization basins
- Clarifiers
- Digesters
- Aeration basins
- Filter beds
- Roofs
- Walls
- Secondary containment

Why it is important to treat these facilities?

- Deteriorating infrastructure
- Meeting government standards & regulations
- Abrasion
- Corrosion rates are Increasing
- Public scrutiny & safety concerns
- Demand for water/desalination
- Privatization

What you need to know about us...

- Our products are 100% solids utilizing the optimum formulations in polymer technology.
- We have NSF 61 potable water approved linings.
- Chemical and abrasion resistant to withstand chemical exposure and physical demands.
- Systems are designed for specific environments that can include engineering fabrics, geotextiles and textured surfaces.
- Thorough problem solving and well defined product recommendations by Lining Project Managers. This is our expertise!
- 95% of linings failures are due to lack of attention to engineering details. Our comprehensive line of systems and complementary products ensure precise execution of details.

What's the Bottom Line?

- Saving money/cost efficient
 - ~ Value, downtime, maintenance, service life
- Abrasion resistant surfaces
 - ~ Suspended solids, debris, volume of water
- Safety
 - ~ Slip resistant, easy to clean
- Image & Looks
 - ~ Public image, odor control, tours

Stonhard provides comprehensive team support that includes product selection, project management, inspections, quality control and long-term maintenance. And a **Single Source Warranty** on both products and workmanship.
